- Maple
- Oaks
- Pistache
- Red Buds
- Sycamore
- Poplar
- Zelkova

City staff use many different cultivars and varieties from the species listed above. The list above is not an all-inclusive list but represents trees the city typically plants.

New Tree Planting

- New street tree locations (that did not previously have trees) are decided based on citizen requests and grant opportunities that allow new trees (conforming to grant requirements).
- Staff also plants new trees based upon recommendations for shade or aesthetic improvements within city parks and properties.
- Species are chosen based on prior experience, suggestions from area nurseries, stake holder recommendations, staff arborist's knowledge and citizen preference (when appropriate).
