

STUDENT VALUE STATEMENTS (Pre)

8th Grade Science
NCSCOS Goal 3: Hydrosphere

Circle Y for “yes” if you agree with the statement or N for “no” if you do not agree with the statement.

1) Stormwater runoff is treated before it reaches the river or ocean.	Y or N
2) What I do in my own backyard affects local waterways and its inhabitants.	Y or N
3) It’s okay if I litter because it doesn’t harm the environment at all.	Y or N
4) I can improve the condition of our waterways if I pick up after my pet when it uses the bathroom outside.	Y or N
5) I would tell a neighbor that it is not acceptable to blow leaves or grass clippings into a storm drain.	Y or N
6) Wetlands and buffer areas are important to protect because they provide habitat for plants and animals and protect water quality.	Y or N
7) It is best to fertilize your yard right before it rains.	Y or N
8) Litter, pet waste, pesticides, fertilizer, sediment, and motor oil are considered non-point source pollution (and the biggest source of pollution in our waterways).	Y or N
9) More people and increased development have a negative impact on the water quality of Wilmington’s creeks and waterways.	Y or N
10) Automobiles should be washed on the grass or at a commercial carwash so the dirty, soapy water does not flow into our waterways.	Y or N
11) I can reduce the amount of trash I create by reducing, reusing, and recycling things.	Y or N
