

Stop the Drop: Use a Rain Barrel!

Rain barrels are a great, simple solution for healing our waterways!

- Rain barrels capture stormwater from roofs, preventing it from carrying pollutants like bacteria, pesticides, oil, and yard waste to local creeks.
- The water is chemical-free, nutrient-rich, free, and perfect for watering lawns and gardens.
- Simple to install at home and easily customizable! Connect a chain of barrels together for more storage or paint them for a fun makeover.

Rain barrels are available for sale through the New Hanover Soil & Water Conservation District in partnership with the City of Wilmington:
